Your cooperative is a proud member of these fine organizations

One of the benefits of being a member of Wyrulec Company is that you are also an owner. Your ownership is reflected in any excess margins the cooperative might have at the end of the year, above and beyond the cost of providing electricity to you.

These excess margins are tracked through what we call “capital credits.” Each member of the cooperative is allocated their share of capital credits or excess margins based on their patronage provided to the cooperative each operating year. These capital credits are held as equity in the cooperative and provide financial stability to the company for many years into the future.

Each year the board of directors reviews the financial position of the cooperative and makes a decision whether or not to “retire” capital credits back to the membership. When capital credits are retired, they

are sent back to the member in the form of a check. It is Wyrulec's goal to retire five percent of the outstanding operating margins or capital credits back to the membership each year on a FIFO (first in - first out) basis. The accounting term “FIFO” means that the members who first provided the equity to the company will be the first ones to get their equity back. Wyrulec has retired approximately \$8 million in capital credits over the last 10 years.

10 EASY WAYS TO \$AVE

Here are 10 habits you can tweak to save energy:

1. Use cold water to wash your clothes.
2. Unplug battery chargers when not in use.
3. Skip the heat-dry setting on your dishwasher.
4. Unplug appliances and electronics not in use.
5. Run full loads of laundry instead of several smaller ones.

6. When drying clothes, include a dry towel for the first 20 minutes.
7. Keep your refrigerator at 35° to 38°F and your freezer at 0°F.
8. Reduce the setting on your hot water heater.
9. Use smart power strips that shut off power to items not in use.
10. When buying new appliances, consider ENERGY STAR versions.
