Office Manager

Your cooperative is a proud member of these fine organizations

GENERAL MANAGER'S REPORT

One of the benefits of being a member of Wyrulec Company is that you are also an owner. Your ownership is reflected in any excess margins the cooperative might have at the end of the year, above and beyond the cost of providing electricity to you.

These excess margins are tracked through what we call "capital credits." Each member of the cooperative is allocated their share of capital credits or excess margins based on their patronage provided to the cooperative each operating year.

These capital credits are held as equity in the cooperative and provide financial stability to the company for many years into the future.

Each year the board of directors reviews the financial position of the cooperative and makes a decision whether or not to "retire" capital credits back to the membership. When capital credits are retired, they are sent back to the member in the form of a check. It is Wyrulec's goal to retire five percent of the outstanding operating margins or capital credits back to the membership each year on a FIFO (first in - first out) basis. The accounting term "FIFO" means that the members who first provided the equity to the company will be the first ones to get their equity back. Over the last 10 years, Wyrulec has returned approximately \$8.7 million back to the members.

Ryan Schilreff
General Manager

CAPITAL CREDITS

Your slice of the cooperative pie!

- 1**
 We keep track of how much electricity you purchased throughout the year.
- 2**
 At the end of the year, we complete a financial analysis and determine operating margins.
- 3**
 Excess revenues are allocated to members (based on electricity use) as capital credits.
- 4**
 When financial conditions permit, our board elects to pay (retire) the capital credits.

continued . . . GENERAL MANAGER'S REPORT

Below is the most recent list of individuals or organizations that have unclaimed capital credits on record with Wyrulec Company. We appreciate your help in returning these margins to the Wyrulec members or their rightful heirs. If your name is listed or if you can provide specific contact information regarding a listing, please call us toll free at 877-WYRULEC (877-997-8532) or visit the Wyrulec office. It is possible that current Wyrulec members are listed because they have been issued checks that are still outstanding. If this applies to you, please contact us so we can issue a new payment to you.

ENERGY EFFICIENCY TIP OF THE MONTH

Placing heat sources, such as lamps, computers or TVs, near your thermostat can result in false temperature readings, increased energy use and inconsistent cooling/heating. Make sure your thermostat is installed in an area clear of obstructions, electronic devices, direct sunlight and drafts.

Ensuring your thermostat is free from these types of interferences optimizes energy efficiency, improves indoor comfort and reduces wear and tear on your cooling/heating system.

New Foreman

Wyrulec Journeyman Lineman Ben Hager was recently promoted to the position of Foreman. Ben is a Torrington native who has been with Wyrulec for 15 years. He's one of the linemen here at Wyrulec that works hard to keep the power flowing every day and in all weather conditions. We'd like to congratulate Ben on his promotion and thank him for his hard work and continued commitment to powering the lives of the Wyrulec membership!

Ben Hager with wife Lara, and daughters Hope and Aftyn

HAPPY LABOR DAY!

The Wyrulec Office will be closed on Monday, September 2nd. We hope you enjoy your day! We will still have a hard-working crew on call - if you need to report an outage, please call 877-WYRULEC.

The following names have been drawn for a \$25 bill credit. Contact Wyrulec Company at 877-WYRULEC to claim your credit!

James Church
Burton Smith
Christine Knittle
James Dolezal
Dennis Simmons

What is a **TRANSFER SWITCH**?

A transfer or throw switch is an essential mechanism that safely shuts off power to the electrical grid before backup power is used. This switch is sometimes referred to as a double-throw switch, as it controls two separate circuits.

The switch's job is to safely transfer power from its primary source to a backup power source, enabling users to maintain power during an outage. It works by connecting a generator to your home's main circuits to provide backup power.

Properly installed transfer switches are essential because they prevent dangerous backfeed into the power grid, which endangers utility workers and others.

Make sure your permanent generator and switch are installed according to code and working properly. Never plug a portable generator into a wall outlet, as this can cause backfeed.
