Assistant Secretary

General Manager
Ryan Schilreff

Senior Staff
Miles Duffy
Operations Manager

Tiphanie Fuss
Office Manager

A Touchstone Energy Cooperative

Your cooperative is a proud member of these fine organizations

Capital Credits

One of the benefits of being a member of Wyrulec Company is that you are also an owner. Your ownership is reflected in any excess margins the cooperative might have at the end of the year, above and beyond the cost of providing electricity to you.

These excess margins are tracked through what we call "capital credits." Each member of the cooperative is allocated their share of capital credits or excess margins based on their patronage provided to the cooperative each operating year. These capital credits are held as equity in the cooperative and provide financial stability to the company for many years into the future.

Each year the board of directors reviews the financial position of the cooperative and makes a decision whether or not to "retire" capital credits back to the membership. When capital credits are retired, they are sent back to the member in the form of a check.

Capital credits are retired to the membership each year on a FIFO (first in - first out) basis. The accounting term "FIFO" means that the members who first provided the equity to the company will be the first ones to get their equity back.

Since Wyrulec's inception, the company has returned over \$20 million to the membership.

Below is the most recent list of individuals or organizations that have an unclaimed capital credit record with Wyrulec Company. We appreciate your help in returning these margins to the contributing patrons or their rightful heirs. Should you find your name listed or if you can provide helpful and specific information regarding a listing, please call us toll free at (800) 628-5266 or visit the Wyrulec office.

Did You Know?

Electric cooperatives have retired \$18 billion to members since 1988 – \$1.3 billion in 2019 alone. Because electric co-ops operate at cost, any excess revenues (called margins) are allocated and retired to members in the form of capital credits.

HARVEST SAFETY TIPS FOR FARMWORKERS

- **Maintain a 10-foot clearance** around all utility equipment in all directions.
- **Use a spotter and deployed flags** to maintain safe distances from power lines and other equipment when doing field work.
- **If your equipment makes contact with an energized or downed power line, contact us immediately** by phone and remain inside the vehicle until the power line is de-energized. In case of smoke or fire, exit the cab by making a solid jump out of the cab, without touching it at the same time, and hop away to safety.
- **Consider equipment and cargo extensions of your vehicle.** Lumber, hay, tree limbs, irrigation pipe and even bulk materials can conduct electricity, so keep them out of contact with electrical equipment.
